TEST CODE

NUM/1/CO

WHAT YOU NEED

- This Question Paper
 - An Answer Sheet
 - An HB Pencil
 - An Eraser
 - A ruler marked in mm and cm
 - You may use a bilingual dictionary
-
- **Calculators may NOT be used**

Do NOT open this Question Paper until you are told to do so by the supervisor

THERE ARE 40 QUESTIONS IN THIS TEST

Total marks available: 40

Try to answer all the questions

TIME ALLOWED – 1 HOUR

Centres may, without prior approval of their awarding body, provide you with an additional 15 minutes in which to complete the test

INSTRUCTIONS TO CANDIDATES

- Ensure that your personal details are entered correctly on the Answer Sheet
- Read each question carefully
- Use an HB pencil and follow the instructions on how to complete the Answer Sheet
- At the end of the test, hand the Question Paper, the Answer Sheet and all notes to the supervisor

REMEMBER: YOU HAVE 1 HOUR TO FINISH THE TEST

Questions 1 to 5 are about planning an event.

Lee plans an event for 28 people. He wants to make a fruit drink. He thinks that each person will have 3 glasses of fruit drink.

1 If Lee is correct, how many glasses of fruit drink should he make?

- A 3
- B 28
- C 56
- D 84

2 Lee has a recipe for fruit drink that makes 15 glasses.

Lee decides to make just enough for 75 glasses of fruit drink. How many millilitres (ml) of lemon juice will he need?

- A 50ml
- B 75ml
- C 250ml
- D 500ml

3 25% of the people at the event do not like the fruit drink. How many do not like the fruit drink?

- A 7
- B 10
- C 21
- D 25

4 Lee asks each person for £3.95 towards the cost. Which method should he use to estimate how much money he will receive?

- A $28 + \text{£}4.00$
- B $28 - \text{£}4.00$
- C $28 \times \text{£}4.00$
- A $28 \div \text{£}4.00$

5 The event starts at 6.45 p.m. and finishes at 9.15 p.m. How long does the event last?

- A $1\frac{1}{2}$ hours
- B $2\frac{1}{2}$ hours
- C 3 hours
- D $3\frac{1}{2}$ hours

Questions 6 to 8 are about a nursery school.

The nursery has decided to take 20 children on a trip to the zoo.

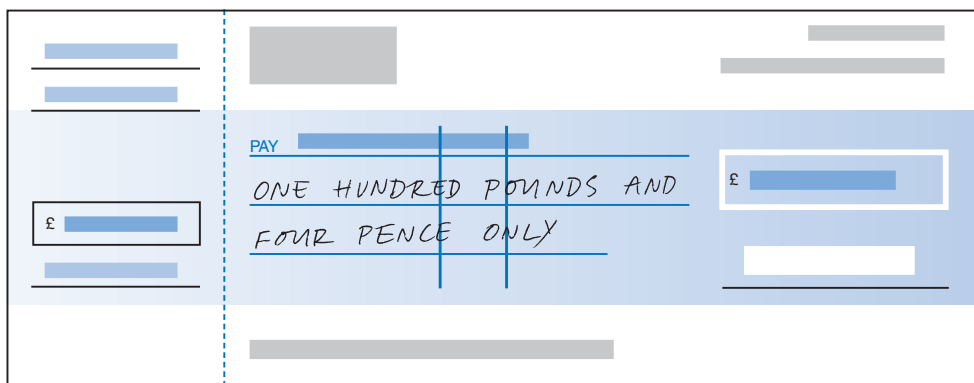

6 For safety the ratio of adults to children must be at least 1 : 4. How many adults are required for safety?

- A 1
- B 4
- C 5
- D 6

7 The group goes to the zoo in cars. Each car can hold 4 people. How many cars would they need altogether?

- A 5
- B 6
- C 7
- D 10

8 The leader writes a cheque for the entrance tickets. The cheque is for one hundred and four pounds and four pence. What is this amount in figures?

- A £104.04
- B £104.4
- C £140.40
- D £1 004.4

Questions 9 to 13 are about the weather in Cyprus.

The table shows the daily hours of sunshine for each month at a holiday resort in Cyprus.

Use the information in the table to answer questions 9 and 10.

Month	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep
Daily hours of sunshine	5	7	8	9	10	11	12	10	9

9 What is the range of the daily hours of sunshine over the months shown?

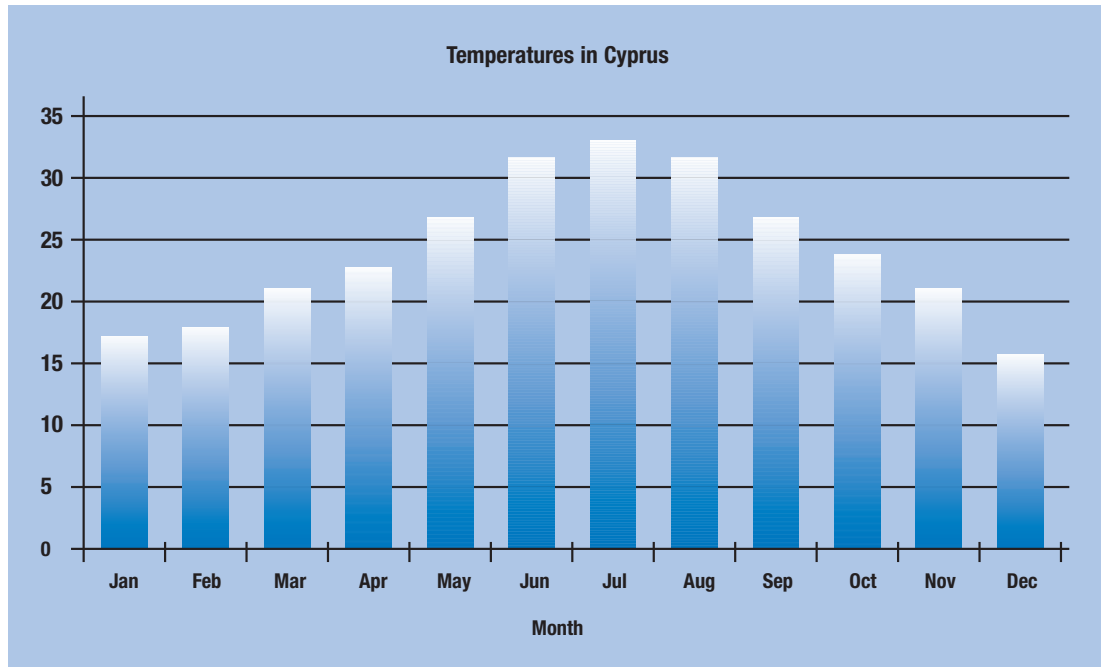

- A 5
- B 7
- C 9
- D 12

10 What is the average (mean) of the daily hours of sunshine for the months in the table?

- A 5
- B 9
- C 12
- D 81

The bar chart shows the average (mean) daytime temperatures in degrees Celsius.

Use this bar chart for questions 11 to 13.

11 The missing label on the y-axis is

- A Temperatures in °C
- B Temperatures in °F
- C Months of the year
- D Weather

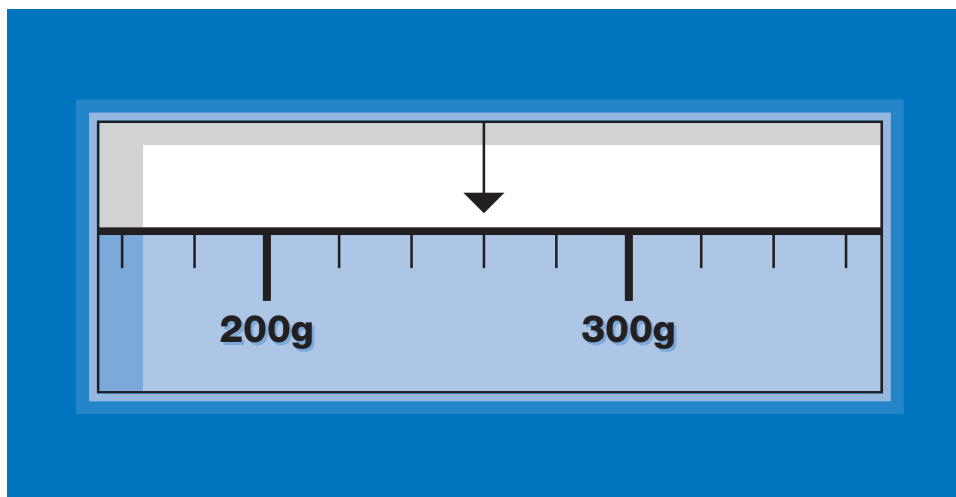

12 What is the coldest month of the year?

- A January
- B February
- C November
- D December

13 How many months of the year have an average (mean) temperature above 20 °C?

- A 5
- B 8
- C 9
- D 12

Questions 14 and 15 are about posting letters and parcels.

- 14** A letter is weighed at the post office and gives the reading shown on the diagram. How much does the letter weigh?
- A 203g
 - B 230g
 - C 260g
 - D 280g
- 15** Four parcels weigh 1.067 kilograms, 1.6 kilograms, 1.67 kilograms and 1.607 kilograms. Which is the heaviest parcel?
- A 1.067kg
 - B 1.6kg
 - C 1.67kg
 - D 1.607kg

Questions 16 to 18 are about a vets' practice.

The table shows all the animals treated by the vets in a week.

Type of animal	Guinea pig	Dog	Cat	Fish	Hamster	Rabbit	Bird
Number treated	7	10	15	3	4	13	8

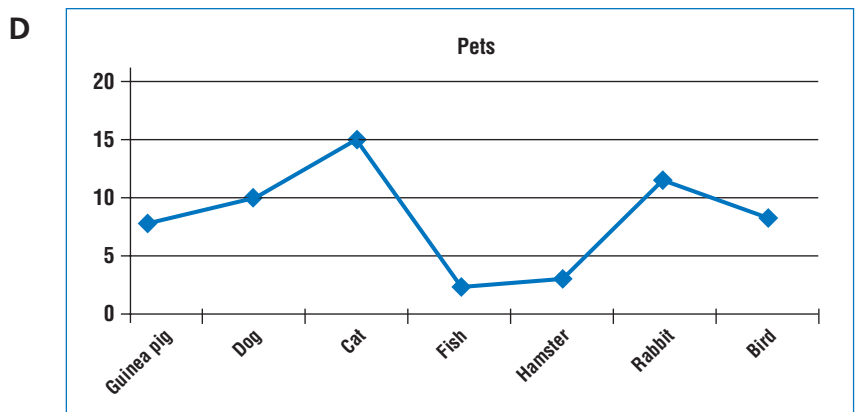

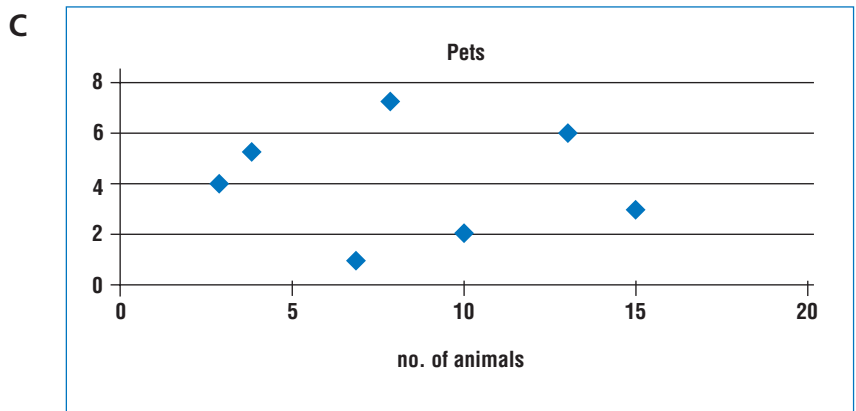

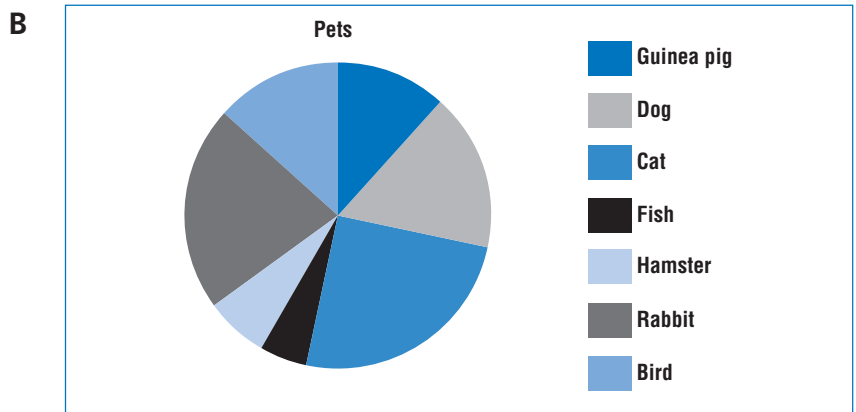

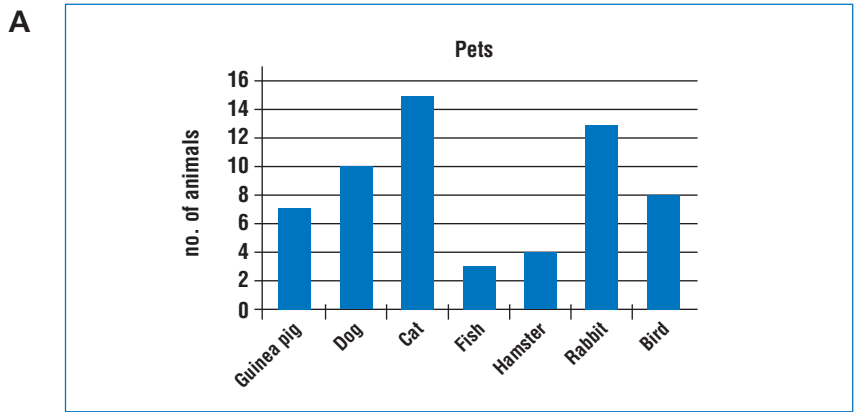

16 How many cats, dogs and rabbits were treated in total?

- A 10
- B 15
- C 25
- D 38

17 What fraction of the total number of animals treated were cats?

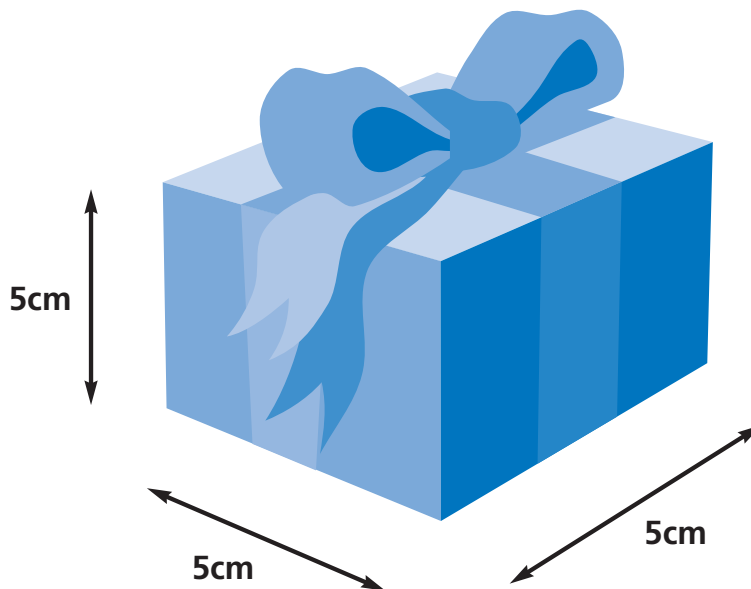

- A $\frac{1}{60}$
- B $\frac{1}{15}$
- C $\frac{1}{4}$
- D $\frac{1}{3}$

18 Here is the same information on charts and graphs. Which one shows the information most clearly?

Questions 19 and 20 are about packing chocolates.

This is a diagram of a chocolate box (Not drawn to scale).

19 What is the volume of the box?

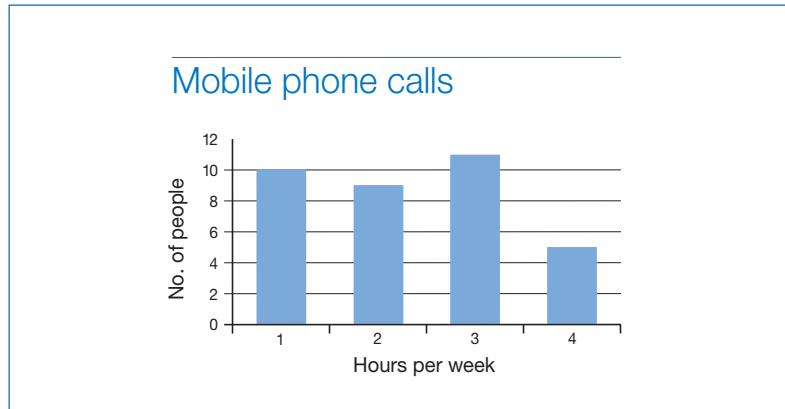

- A 15cm^3
- B 25cm^3
- C 125cm^3
- D 555cm^3

20 Each box contains 12 chocolates. How many boxes will 1 800 chocolates fill?

- A 120
- B 150
- C 180
- D 216

Questions 21 and 22 are about mobile phones.

The chart shows how many hours per week a company's sales team spend on their mobile phones.

21 How many people work in the sales team?

- A 4
- B 12
- C 30
- D 35

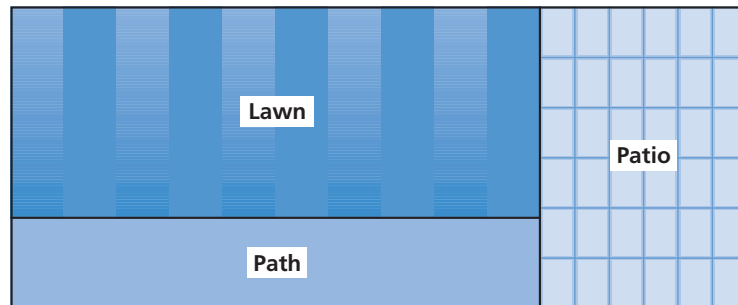

22 A store is offering mobile phones with 25% off the marked price. How much will a phone actually cost if the marked price is £72?

- A £18
- B £25
- C £47
- D £54

Questions 23 to 26 are about a garden.

This is a scale plan of the garden. The scale is 1cm : 200cm.

23 What is the length on the diagram of the short side of the lawn?

- A 1cm
- B 3cm
- C 4cm
- D 7cm

24 The path is 1.2 centimetres wide on the plan. What is its real width in the garden?

- A 24cm
- B 120cm
- C 240cm
- D 2400cm

25 The patio has an area of 46.64 square metres. What is this to the nearest square metre?

- A 46m²
- B 46.6m²
- C 46.7m²
- D 47m²

26 One packet of grass food will cover 12 square metres. The area of grass is 84 square metres. What fraction of the grass will one packet cover?

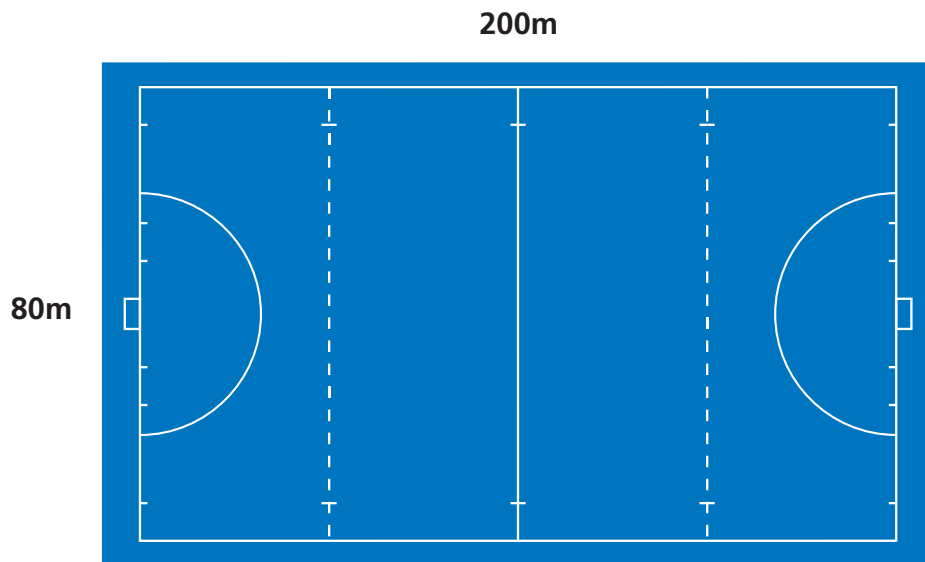

- A $\frac{84}{12}$
- B $\frac{1}{84}$
- C $\frac{1}{12}$
- D $\frac{1}{7}$

27 Four people rent a flat. The weekly rent is £121.76. They share the rent equally. Which calculation do they need to do to work out how much they each need to pay per week?

- A $4 \times \text{£}121.76$
- B $4 \div \text{£}121.76$
- C $\text{£}121.76 \div 4$
- D $\text{£}122 \div 4$

Questions 28 to 30 are about a sports field.

The field measures 200 metres long and 80 metres wide.

28 What is the total area of the field?

- A 280m²
- B 360m²
- C 1600m²
- D 16 000m²

29 What will the length of the field be on a scale drawing that uses a scale of 1 millimetre to 1 metre?

- A 20mm
- B 80mm
- C 20cm
- D 200cm

30 The groundsman has to fence off a rectangular area of 72 square metres for the high jump. The length must be 12 metres. How wide must it be?

- A 6m
- B 8m
- C 12m
- D 24m

Questions 31 to 33 are about how many people attend football matches.

In 1996, the crowd at the semi-final of Euro 96 was 34 236.

In 2000, the crowd at the semi-final of Euro 2000 increased by 2 500.

31 What is the crowd in 2000 rounded to the nearest 100?

- A 36 700
- B 36 740
- C 36 800
- D 37 000

32 45 000 people go to the Euro 2000 football final. About 20% are under 16. Approximately how many people are under 16?

- A 2 000
- B 4 500
- C 9 000
- D 25 000

33 The largest ever crowd at a football match was 199 000 people. What is this number in words?

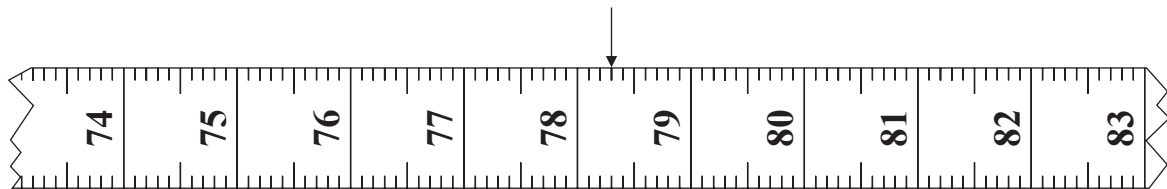

- A one hundred and ninety nine million
- B one million nine hundred thousand
- C one hundred and ninety nine thousand
- D nineteen thousand nine hundred

Questions 34 to 40 are about a gym.

Stuart joins the gym to get fit and to lose weight.

34 He weighs himself using a metric scale. The reading is 85. How much does he weigh?

- A 85lb
- B 85m
- C 85kg
- D 85km

35 Next, he measures his waist. The arrow shows the measurement. What is his waist measurement?

- A 78.0cm
- B 78.3cm
- C 79.0cm
- D 79.7cm

36 Membership of the gym costs £36.50 a month. How much is this per year?

- A £36.50
- B £365.00
- C £438.00
- D £4 380.00

- 37** The manager of the gym pays 4 cheques into the bank. The amounts are £438.00, £4 380, £36.50 and £365. What is the total amount paid in?
- A £4 116.50
 - B £5 183.50
 - C £5 219.50
 - D £52 195
- 38** Over a year, the gym has 7 683 visitors. What is this to the nearest ten?
- A 7 600
 - B 7 680
 - C 7 682
 - D 7 690
- 39** The gym needs a new carpet for the reception area. Which units are normally used to measure the area of a carpet?
- A yards
 - B square inches
 - C metres
 - D square metres
- 40** When he starts going to the gym Stuart can run 5 kilometres in 24 minutes 10 seconds. After six weeks he can run the same distance in 21 minutes 25 seconds. He thinks he has improved by 2 minutes 45 seconds. Which calculation can he use to check if this is correct?
- A $21\text{m } 25\text{s} \div 2\text{m } 45\text{s}$
 - B $21\text{m } 25\text{s} + 2\text{m } 45\text{s}$
 - C $21\text{m } 25\text{s} \times 2\text{m } 45\text{s}$
 - D $21\text{m } 25\text{s} - 2\text{m } 45\text{s}$
